Career Objective:

Detail-oriented Junior Web Developer with a strong foundation in modern front-end architecture and full-stack frameworks. Passionate about building highly responsive, user-centric applications using React and Next.js. Eager to leverage strong problem-solving skills and a background in modern styling libraries to deliver scalable web solutions and contribute to a collaborative engineering team.

Technical Skills:

- **Technologies & Tools:** JavaScript (ES6+), React, Next.js (App Router), Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Figma.
- **Interpersonal Skills:** Problem-solving, adaptability, clear communication, and teamwork.

Projects:

1. Venture Vista:

- **Overview:** A comprehensive full-stack travel and tourism platform designed to help users seamlessly explore, book, and manage destination packages.
- **Links:** [Live Link](#) | [GitHub Client Link](#) | [GitHub Server Link](#)
- **Major Features:**
 - Integrated a secure user authentication system and a personalized dashboard, enabling users to seamlessly browse dynamic destinations, secure reservations, and track past or current bookings.
 - Implemented comprehensive admin management features utilizing complete CRUD operations to efficiently add, update, or delete travel packages from the database.

2. Med_Flex:

- **Overview:** A comprehensive healthcare management platform designed to streamline doctor appointments, patient records, and flexible medical consultations.
- **Links:** [Live Link](#) | [GitHub Client Link](#) | [GitHub Server Link](#)
- **Major Features:**
 - Intuitive patient portal allowing users to easily search for doctors, book appointments, and track their medical history in real-time.
 - Dedicated doctor and admin dashboards for managing patient schedules, updating prescriptions, and overseeing overall system operations.
 - Secure user authentication with role-based access control (Admin, Doctor, Patient) to ensure strict data privacy and system security.

Education:

Khulna Polytechnic Institute

Diploma in Computer Science and Technology (CST) 2025 - Present
